

Environmental policy

Baxter and Bailey is committed to conducting business in an environmentally responsible manner. We always seek to understand our environment and the impact of our activity on it, developing solutions that are shaped by and enhance the local environment, and that make effective use of natural resources.

To this end we will:

- Seek to understand our environment and the impact of our activity on it, and actively promote employee's awareness of environmental issues.
- Develop solutions that are shaped by and enhance the local environment, and that make effective use of natural resources.
- Avoid the use of environmentally hazardous materials and processes wherever possible.
- Develop a culture where assessment of environmental impact is at the core of good design and include evaluation in the project review and quality assurance processes.
- Assess environmental impact alongside other factors when making commercial decisions.
- Comply with all relevant environmental legislation and industry codes of practice.
- Appoint a member of staff to be responsible for the implementation of this policy.
